►Read the following passage, then answer the questions:

In Egypt, the tourism industry has come to hold a position of great importance lately. It is felt that it could help increase the national income. In some European countries, tourism has brought in millions of dollars yearly, although they lack the natural and historical attractions we have in Egypt. We could, for instance, establish tourist villages for children on the Red Sea. We could teach fishing,

swimming, diving and sailing there. Another good idea would be a village in the New Valley for horse riding. And what about villages for people with health problems like rheumatism? The warm dry climate of Aswan and Helwan would certainly help them get better.

Our tourist today wants efficient and friendly service. He would probably prefer to try our samples of our local food rather than eat the international meals, which are served, in some places. It must also be remembered that most tourists nowadays are seldom rich. Many of them are students or hardworking employees. So what is needed is not expensive hotels but clean comfortable places to sleep and eat in at reasonable prices. This, too, would encourage Egyptians to travel more and more around their lovely country.
